Rhubarb or Pie Plant  
The first fruit of the season

Rhubarb can be planted either in the fall or in the spring, is very hardy which needs some attention & very rich soil to get the best results, & it must have a dry warm place & no shade from buildings or shade of trees in order to get the best results.

Kyatt Simnans This is the earliest red tender which give best results.

Strawberry Rhubarb is late season large stock sower does not take as well as the Simnans

## Currant & Varieties

Fay Prolific is a rank grower & very prolific for commercial planting grow Fay Prolific

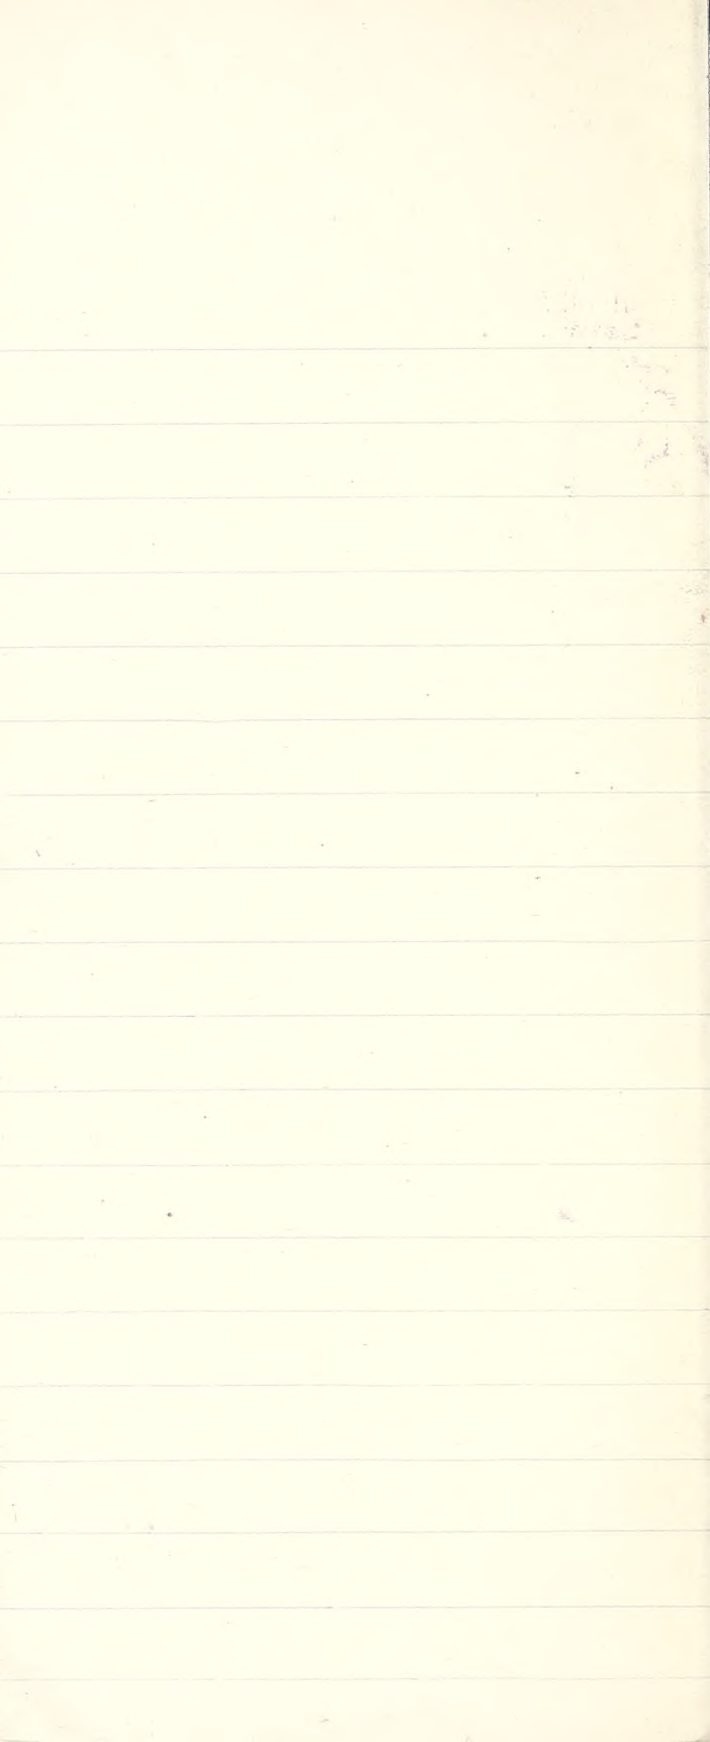

For home use grow the white Grape, the fruit is white & quite sweet much finer for table use than the red varieties

Gooseberry they  
is many kinds  
the best varieties for  
general market is  
the Downing large  
green very prolific &  
good shippin commands the  
best prices

Houghton Gooseberry  
are small pale red  
& very productive

Blackberry is  
 a profitable crop in  
 your good soil and  
 will produce fine  
 crops on dry lands &  
 is a good winter  
 making crop to grow  
 for a living. There is  
 much time now  
 the best for  
 profit

7

Blue culture  
around the same  
quantity is - 1000  
being cultivated by  
an agent in the  
State of Virginia  
the same is 3'  
long but can be  
cut to 1' or 2'  
it will be 1' or 2'  
smaller than the  
one shown showing  
the top will last  
in a wet state on  
the hills or meadows  
or swamps of our state

Russian Mulberry  
is a wonderful fruit  
is not being grown  
by any body in our  
State. Mulberry trees  
grow large as any apple  
tree. the fruit look  
like a common blackberry  
black in color & about  
as large blackberry. the  
fruit are very fine  
for making pies or  
canning. the fruit  
grows from middle of  
june till into  
september about three  
months of the season  
you can pick fresh  
mulberries every day  
the trees are hardy

about 9' Trees  
are not being  
grown by the farmers  
in Okla.

now there is several  
kinds that can be  
grown in Okla.  
just as easily as the  
apple tree

Buran Walnut  
is a very hardy & will  
grow & produce good  
crops in Okla.

American sweet chestnut  
can be grown in Okla.  
with good success &  
grow good crops most  
every year & have been  
growing these varieties  
for several years &  
get good crops

The Grapes are not-  
being grown by any  
body hardly  
its a mistake not  
growing this fine  
delish fruit  
the early varieties  
can be grown in  
shain & get ripe  
by taking little care  
in the fall month.  
grow the grape on  
the warm side of some  
building out the  
way of frosty  
mornning & they  
will get ripe & get  
some fine grapes
